

Our Mission

We strive to spread the Good News of Jesus Christ and to provide a quality education for each child in a safe and caring environment. We utilize St. John Bosco's system of reason, religion and loving kindness. We encourage our children to develop their own potential fully, recognizing their own uniqueness. We strive to prepare our children for life.

Core Values

We are committed to the Christian education of youth and serious scholarship. Our school is guided by a Catholic philosophy of education; stressing the harmonious development of the whole person. We offer superior academics, Christian values and spiritual growth.

Education takes place in a nurturing environment imbued with Gospel principles. We foster a family experience where mutual respect and trust exist between family, faculty and students. We believe the constant cooperation between home, school and church will help our children become people of true character.
